

Platinum UV

IAQ Line with Unique Branding

Sell the Best & Don't be Undersold!

The Platinum UV line (from Fresh-Aire UV) represents the very best in IAQ products in terms of quality, design features, and durability. Because these products are only available through limited and tightly controlled distribution they will never be seen on the internet, eliminating any problems related to discount prices.

Platinum UV

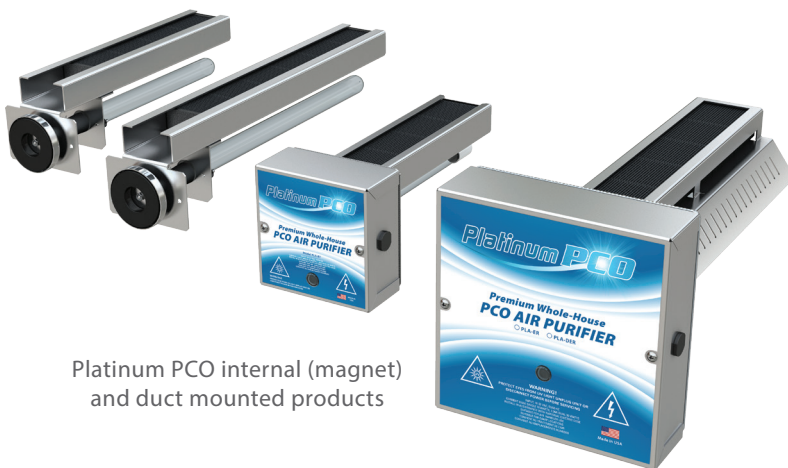

Germicidal UV light provides HVAC disinfection and improves indoor air quality by killing airborne germs. It keeps AC coils free of mold which saves on maintenance and extends the life of the air system. Choose from several power supply and lamp options.

Platinum PCO

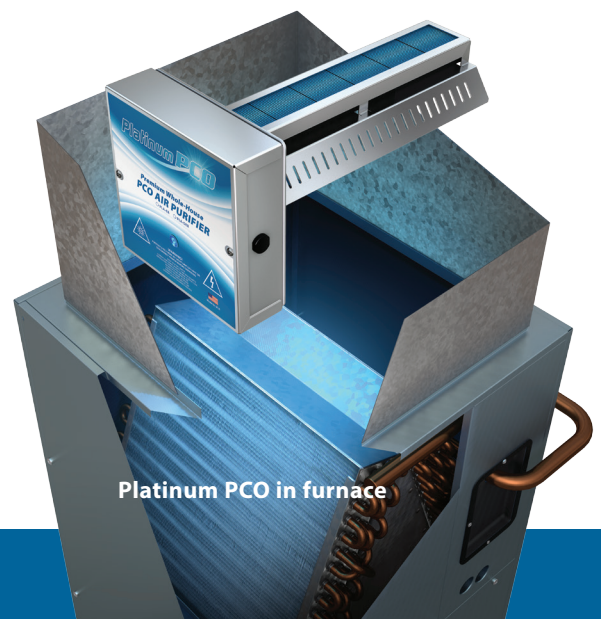

This whole-house photocatalytic air purifier combines UVC disinfection with activated carbon for unmatched odor and VOC elimination. Several models to choose from including duct-mounted and internal magnet-mounted models with 9" or 13" lamps. Proven effective against odor-causing and potentially toxic VOCs as well as mold, bacteria, viruses, and allergens.
